

CD-Rom Contents

Welcome to the 50-year Wetland Vision CD-Rom. The Wetland Vision Project maps and reports can be accessed here.

1. A 50 year wetland vision

PDF of the leaflet accompanying the CD-Rom, which explains the 50-year Wetland Vision

2. Technical documentation

Wetland Vision Technical Document: Overview and reporting of project philosophy and technical approach

This document sets out the background methodology, policy context, and further detail of the Wetland Vision. It shows:

- How Geographical Information System (GIS) data have been used to develop maps
- Maps for individual wetland habitats and the Vision for them
- More detail on the kinds of targets that have been adopted
- How constraints were considered or integrated in the production of the Vision
- A record of our stakeholder engagement process
- Various other reports that were commissioned relating to the ecosystem services that wetlands can deliver, and issues surrounding wetland creation and airports

Wetland Vision maps

Contained within this section is range of maps that have been produced by the project, including supplementary information on the historic environment.

Local vision guidance material

This document is for anyone wishing to make use of the projects outputs at the local level, and potentially develop a vision for wetlands. It has three main components:

- How to interpret the Wetland Vision at the local level
- Local information that can be consulted to add value to the national Vision
- Best practice on putting together, or informing a local vision, including guidance on using and promoting ecosystem service terminology
